K-LASER™ USA

The next generation in Laser Therapy

K-Series 1200 (12W)
Class IV Therapy Laser

K-Series™ Therapy Laser

Representing the most advanced technology in laser therapy, the K-Series™ delivers innovation never before seen in the industry. Additionally, K-Series™ offers comprehensive solutions with a flexible architecture to prepare you for the challenges of the future.

K-Laser® History

Built upon a solid foundation of European research and development, K-Laser® has earned worldwide recognition for its therapy solutions. Our development team has many key contributions to its credit, and the commitment to innovation has never been more evident.

K-Laser® History of Innovation

1990	1990-2000	2002	2005	2006-2007	2007	2008	2009
Class IV laser therapy established in Europe	Class IV therapy technology develops & becomes mainstream	K-Laser® introduced in Italy	K-Laser® is FDA cleared in USA	New fiber and handpiece tip innovations	Release of K-Laser® zoom hand piece Introduction of 10 watt laser	New presets for software version 9.2 Intense Superpulse developed	Development of new Integrated Clinical Hand piece K-Series™ launched

Engineered to provide the most advanced laser therapy *Technology*

Our unique range of laser formatting capabilities allows you to deliver more effective treatments with less work, ultimately generating better outcomes.

Continuous Wave

Manage pain and promote biostimulation on surface and underlying tissue.

Modulation

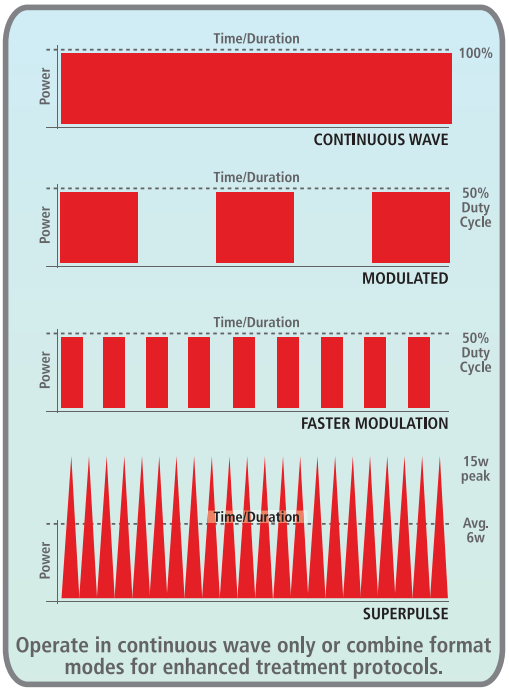

Elicit specific tissue responses through frequency modulation.

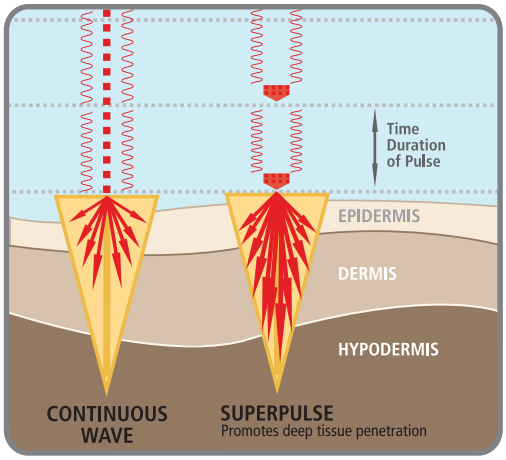

Superpulse

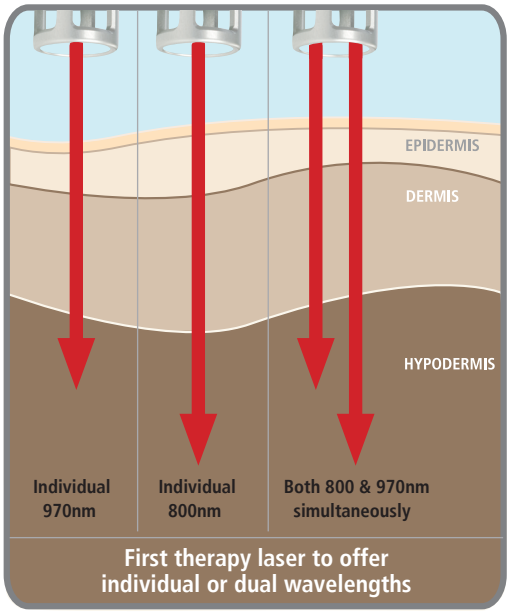

Pulsing at higher peak power up to 20,000 times per second, driving energy to deeper targeted areas.

Wavelength

Choose wavelength of 800nm or 970nm or employ dual wavelengths simultaneously.

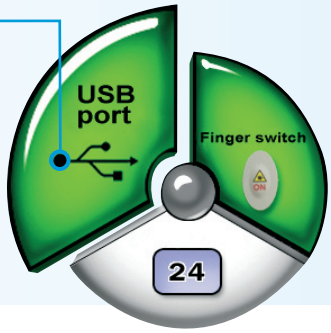

Serving clinicians today and into the future through *Innovation*

Fiber Optic Cable

Upgradeability

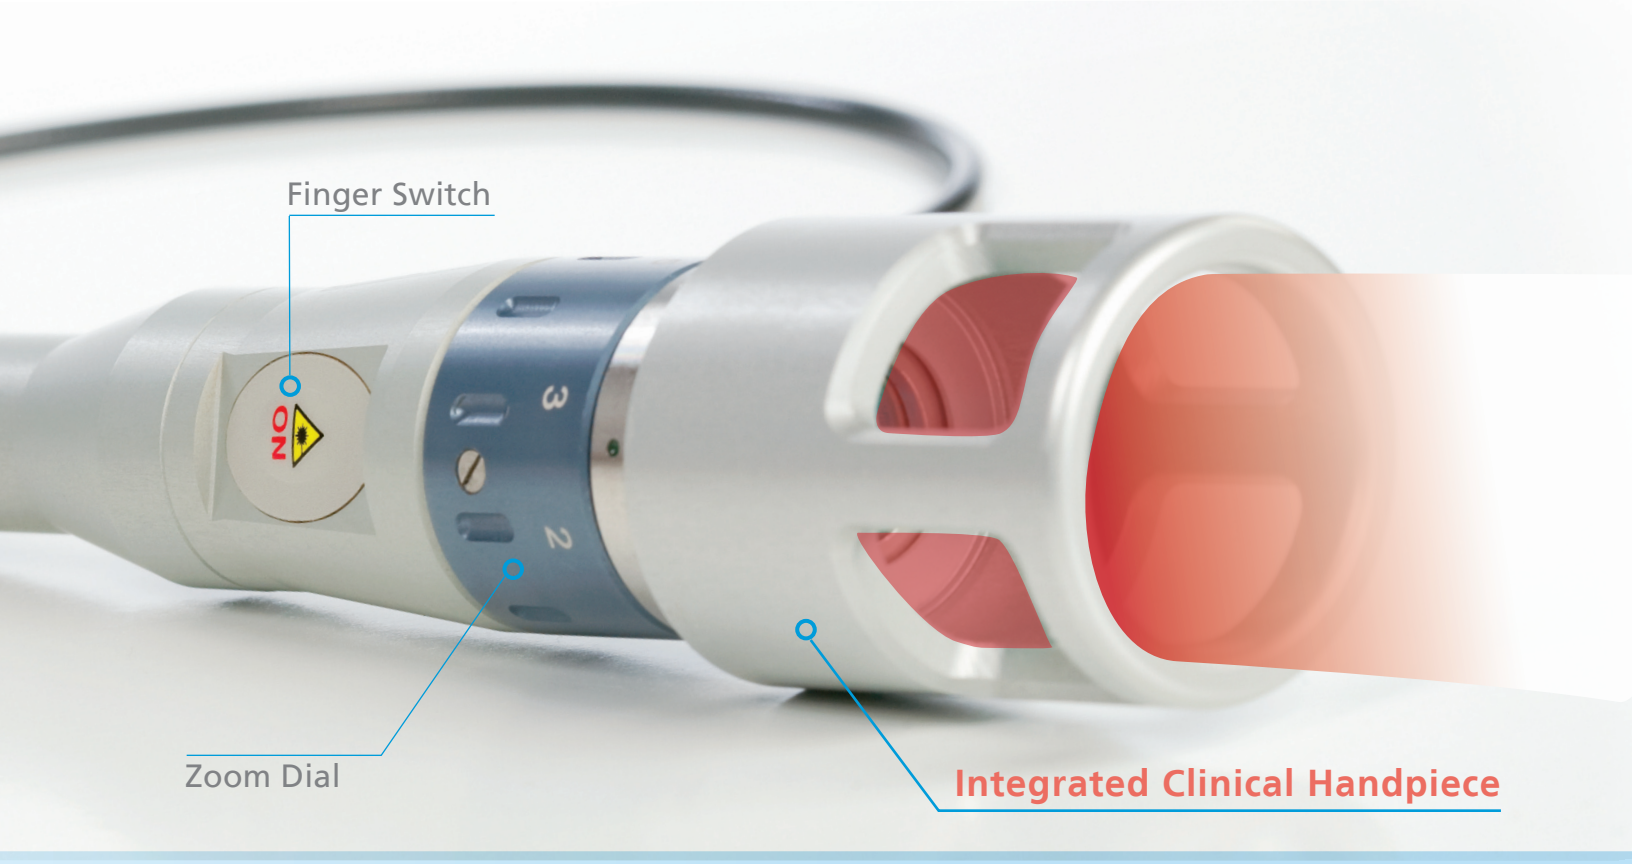

- Latest software updates
- Software enhancements
- Future technology

Ergonomic Cart

- Optimal operator comfort
- Height adjustment
- Superior mobility

K-Laser® continues to lay the foundation for the future of laser therapy, reaffirming our commitment to excellence. The K-Series™ establishes a new level of performance by which all others will be measured.

Portability

- Unparalleled convenience
- Battery power
- Overcome limitations

Embedded technologies to help streamline *Workflow*

The K-Series™ advanced technologies are designed to make treating patients easier and more effective while increasing your overall efficiency.

Touch Screen

Effortless navigation of menus using color touch screen display.

User Interface

Intuitive software guides operator and further enhances ease of use.

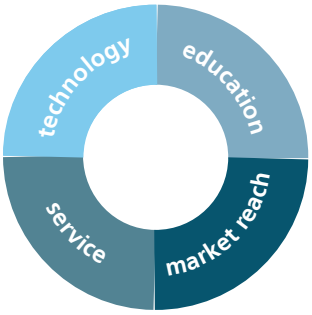

Anatomical Presets

Indication specific protocols at your fingertips. Adjustable and storable for repeat success.

Integrated Clinical Handpiece

Eliminates need for foot pedal while providing flexibility and consistency.

Welcome to *K-Life*™

A unique customer care solution that maximizes satisfaction. K-Life™ represents a family of programs that provide additional value and enhances your experience over time. These support programs are designed with a key goal in mind: **investment protection.**

technology

Stay current with software enhancements and anatomical presets. Prepare for new technologies and future advancements.

education

Online resources and quality installation training ensure operation at peak performance. CE programs that help you build your knowledge and skill.

service

Expanded coverage through an extended warranty which includes a maintenance program for your handpiece and fiber optic cable.

market reach

Evolving tools to attract more clients and increase market awareness for your laser therapy service.
